Rohit Sharma

System Engineer at Tata Consultancy Services
Pune/Pimpri-Chinchwad Area

Summary

Rohit Sharma

A passionate student learning how to code | aspiring SDE

I absolutely love python with a strong interest in coding and software development. Coding is my superpower, unleashing the potential of artificial intelligence is my driving force. As a relentless student of the digital realm, I immerse myself in the world of programming languages, unlocking endless possibilities through code.

I believe that every line of code has the power to shape the future. With a blend of technical prowess, creative thinking, and a passion for problem-solving, I thrive in the ever-evolving landscape of software development.

My journey began at Techno main, Salt lake, where I embarked on a mission to unravel the mysteries of programming. Armed with a hunger for knowledge and an insatiable curiosity, I have delved deep into languages like Python, C, Java and JavaScript, learning the building blocks of this digital universe.

If you're searching for a trailblazing software developer with an unyielding spirit, let's connect. Together, we can rewrite the rules, reimagine possibilities, and create a digital landscape that solve day to day problems with better efficiency and forge a path towards a more informative and transformative world.

Experience

Tata Consultancy Services
System Engineer
August 2026 - Present (2 months)
Pune City

Olcademy

Data Engineer

January 2025 - July 2025 (7 months)

Kolkata, West Bengal, India

Currently powering the database of the company scraping, preprocessing and deriving insights from raw real world data.

TECHPLEMENT

Python Developer

November 2024 - December 2024 (2 months)

Kolkata, West Bengal, India

During this internship, I contributed to the communication sector, focused on developing an autonomous email sending system integrated with logging and tracking functionalities with a well maintained database applied security best practices for storing sensitive information, including environment variables for email credentials.. This project aimed to streamline bulk email distribution while maintaining efficiency, security, and transparency.

Designed a dynamic email sending logic that adjusts the rate of email dispatch based on configurable limits, avoiding email server restrictions and also prevented issue classifying emails as spam.

Education

Techno Main - Salt Lake

Bachelor of Technology - BTech, Computer Software Engineering · (November 2022 - July 2026)
